NATHISMUS, SOUTHKENS, LONDON.

DEPARTMENT OF ENTOMOLOGY
BRITISH MUSEUM (NATURAL HISTORY),
CROMWELL ROAD,
LONDON, S.W.7.

2nd September, 1952.

Dear Mr. Stelfox,

Many thanks for the data of the Xylota lenta, also for the box of Syrphidae. Although all these have been noted as Irish, they include two interesting species- Platychirus scambus Staeg. ♂ and Eristalis abusivus Collin ♂. The latter is uncommon, resembling the common E. arbustorum L. very closely. For your information, the Platychirus is from Newcastle, 12.8. and the Eristalis is Newcastle, Co. Wicklow, 5.8. Co. Wicklow.

I shall be pleased to see any further Syrphidae that you catch this season,

With kind regards to Mrs. Stelfox and yourself,

Yours sincerely,

R. L. Coe
